

AUTOMATIC POLARIMETER POL11-30

AUTOMATIC POLARIMETER POL11-30

A polarimeter is an instrument used for determining the polarisation direction of the light or the rotation of an optically active substance.

Used in pharmaceutical, petroleum, food, chemicals, flavors, spices, sugar marking, universities, research institutes.

Also known as Polarimeter, Auto Polarimeter, Auto Digital Polarimeter.

POL11-30 AUTOMATIC POLARIMETER

The Peltier system automatically controls the sample temperature in the Automatic Polarimeter max range from 10 °C to 50 °C.

For calibration Additional Standard polarization tubes with software can be used by user.

Large color touch screen display and innovative software interface give extremely convenient device operation and data acquisition.

5.6 inch touch screen.

High brightness LED lights with service life exceeding 100000 hours. To void the light source exchanging.
